

# NuCharge A-Thane II

554-555 series

### PRODUCT DESCRIPTION

**Type** Electrostatically applied two component acrylic

polyure than e.

**Description** NuCharge A-Thane II is a two-component, high performance acrylic polyurethane designed for

exterior usage when superior corrosion and chemical resistance is desired. It provides resistance to gasoline, solvents, and brine. The 555 series are full gloss, and the 554 series are

semi-gloss.

**Uses** • Metal Buildings

• Aluminum Extrusions

· Wrought Iron railings and fencing

• Exterior furniture, recreational equipment, and

machinery

Features • Gloss & semi-gloss finishes available

· Custom color bases including metallic and mica

· Long pot life of 6 hours

• V.O.C. less than 2.8 lbs. / gal.

· Superior exterior durability

### **SUBSTRATE & SURFACE PREPARATION**

All Substrate must be clean, dry and free of

contaminants.

**Steel & Iron** The minimum surface preparation for steel and

iron is Hand Tool Cleaning per SSPC-SP2. Power Tool Cleaning per SSPC-SP3 is preferred for better performance. Prior to either procedure, the surface should be solvent cleaned per SSPC-SP1. Feathering around scratches is recommended because certain surfaces may lift when coated. A

quick test should be conducted in an inconspicuous area to determine if a base coat

should be removed or primed.

Primer Low VOC EZ Electrostatic Universal Primer (211

Series), or 214D7185 NuCharge It Low VOC

Primer.

### **MIXING & THINNING**

Ratio 2 – components. Mix base and cure components at a 4:1 ratio. The curing agent is **554X4070A NuCharge** 

**A-Thane II Activator**. Ensure both components are

above 45°F before mixing and using.

Mix the base and component thoroughly before use

by boxing or with mechanical agitation.

Thinning Thinning is not normally needed. Add 560X1557

**NuCharge It VOC Exempt Reducer** as required. Add 3-4 ounces of **480X9999 Roll-A-Glaze** per mixed gallon to reduce dry spray and orange peel, if required. **480X9999 Roll-A-Glaze** can be added to help add a wet edge for spraying large parts and to

aid in brush and roll applications.

**Pot Life** 6 hours sprayable @ 77°F.

Cleanup Use NuCharge It Reducer (560X2005).

### **APPLICATION GUIDANCE**

**Application Conditions** 

Excessive film or surface contamination may cause adhesion problems and solvent entrapment. DO

NOT USE IN HEATED AIRLESS EQUIPMENT, as

gelling will occur.

**Brush** Brush application in small areas

**Roller** Short nap or mohair phenolic core roller. Thinning

is not normally needed. Add **560X1557 NuCharge It VOC Exempt Reducer** as required. Add 3-4
ounces of **480X9999 Roll-A-Glaze** per mixed
qallon to reduce dry spray and orange peel, if

required.

**Spray** This product may be applied by electrostatic,

conventional, HVLP, and airless equipment. Dry

times can be accelerated by using NuCharge It

**Epoxy Accelerator 480X4530.** 

## **CURE TIME & RECOAT WINDOW**

Substrate Temperature	To Touch	Tack Fee	To Recoat	Full Cure
75°F (24°C)	1 hour	2-3 hours	When dry to	7 days

Drying times are dependent upon film thickness, temperature and humidity.

# NuCharge A-Thane II

554-555 series

# PACKAGING, ESTIMATING & HANDLING

Product	Code	Packaging	
NuCharge A-Thane II	554-555 series	1-gallon pails filled 80%.	
NuCharge A-Thane II Activator	57X4070A-G.25	Short filled quarts to allow full 1-galln kits when mixed.	
Theoretical Coverage	350-700 ft $^2$ / catalyzed gallon @ 1.0 – 2.0 mils dry film thickness.		
Storage & Shelf Life	Maintain products in original packaging and sealed until ready for use. Estimated shelf life is 2 years when stored in a dry area at 70°F (21°C). Actual shelf life may vary with storage conditions.		

Ventilation

Safety

Provide thorough air circulation during and after application until the material has cured when used in enclosed areas.

Mixes and applications of this product

present several hazards. Read and follow the hazard information, precautions and first aid directions on the individual product labels and safety data sheets before using.

# **TYPICAL PHYSICAL PROPERTIES**

Property	Typical Value			
Specific properties below are of 555T1000 Gloss White				
Colors	Full range			
Gloss	<ul><li>High Gloss 90+ units, <b>555T1000</b></li><li>Semi-gloss 30-40 units, <b>554T1000</b></li></ul>			
Pot Life	6 hours  Do not use catalyzed material that has exceeded its pot life.			
Volume Solids	46%			
Viscosity	34-44" Zahn 2			
Recommended DFT	370-737 ft $^2$ / catalyzed gallon @ 1.0 – 2.0 mils dry film thickness.			
Flash Point	Mixed 64.4°F			
VOC	<2.8 lbs. / gal. (334 g/L) mixed			
Weight / gallon	11.3 lb./gal. base component			
Temperature Resistance	250°F			
Shelf Life	2 years unopened and unactivated
