Satin Enamel DTM

The Coatings You Need, The Quality You Deserve...

SATIN ENAMEL

Our Signature Paint of the Metal Master Series...

- **LEAD AND CHROME FREE**
- **QUICK DRY**
- **SUPERIOR ADHESION**
- **EXTREME DURABILITY**
- **CORROSION RESISTANT**
- **LONG LASTING BEAUTY**

Satin Enamel is lead and chrome free and may be applied by conventional or airless spray, brush, roller or dipped. Its' unique formulation, with built-in rust inhibitors and modified vinyl liquid base, acts as a primer as well as a topcoat to reduce corrosion while obtaining a durable, attractive finish. Available in several colors shown on reverse side. All colors are available in gallon cans. Fives, drums and aerosols available in limited colors.

 Start First With The Finish That Lasts!

Satin Enamel Black 885N2100

...the #1 true ornamental iron finish offers you a self-priming system for direct-to-metal applications.

The built-in rust inhibitors make this product ready to use without a primer. Satin Enamel is great for handrails, castings, tubing, security bars, screening, grills, gates, and much more. Additional colors available as shown on reverse side.

High Gloss Black Enamel 882N0090

...an economical fast drying modified enamel that offers high gloss with excellent color and gloss retention. This product is recommended over one of our primers for exterior use. Packaged in ones and fives.

Flat Black Enamel 885N3879

...a lower sheen version of our popular Satin Enamel. This product has built-in rust inhibitors and performs as a primer and/or topcoat. Desiring that wrought iron look, this is the product of choice. Available in ones and fives.

Firebox Black 843N3619

...our high heat paint for bar-b-que grills, stoves, fireplace tools, etc., offering heat resistance up to 850°F.

Uni-Pox Primer (855-Line)

...this great product is a premium blend of epoxy and other premium resins. Uni-Pox offers high solids, low VOC, excellent corrosion resistance and excellent adhesion characteristics. This primer can be topcoated with most paints, normally within the hour, and is available in three colors: Gray-Green (1368), Off White (1370), and Gray (1373).

Red Shopcoat Primer 801R2712

...a user friendly high solids paint that offers a low VOC, less than 3.5 lbs per gallon. This product is a great economical value offering the kind of protection you need. Can be top-coated with most single packaged paints. Also available in Gray (801D1007). Packaged in ones, fives, and aerosols.

High Solids Universal Red Primer 100R1369

...our Premium Universal Quick Dry Primer is a quality product that offers high solids and low VOC. This product can be topcoated with epoxies, urethanes, acrylics, enamels, and many other finishes without any critical recoat time. Also available in gray (100D1364). Packaged in ones, fives, and aerosols.

Low VOC Satin Black 840N3100

...offers many of the great features of our popular Satin Black. Higher in solids and offers lower VOC to meet strenuous VOC regulations. Available in black only.

NuCharge It™ Paints

...electrostatic paints offered in an Acrylic Enamel, Two-Part Acrylic Urethane and a Two-Part Epoxy. These products are ready to spray using various types of electrostatic spray equipment without thinning. Get the maximum coverage using "Electrostatic Application" eliminating overspray. Offered in black, white and custom colors.

W/R Sure Grip (PFGA)

...a water reducible black used as a primer or a low-lustra finish over galvanized or aluminum substrates. This product gives that added adhesion required for painting over non-porous surfaces. Available in ones only.

Redi-Spray

...convenient Ready-to-Use Aerosols packaged in 12 ounce cans, designed for touch-up and quick repairs. Available in many of our products and filled from the same production batches of which gallons are filled, so you can be assured of consistent color matches.

Galvalox (Cold Galvanizing Compound)

...Galvalox is an organic Cold Galvanizing Compound that contains over 90% zinc in the dried film which protects the steel substrate by acting as a sacrificial coating. Galvalox is ideal for repair and maintenance of hot dipped galvanizing. Available in ones, quarts, and aerosols.
